

Definitions

- **Blot:** a single piece occupying a point on the board. Can be “hit” off
- **Hit:** Sent to the bar, where it must be re-entered onto the board before the player can move any other piece
- **Anchor:** two or more pieces occupying a point. Cannot be hit off
- **Home:** the final quadrant of the board for each player. All of a player’s pieces must be moved here before they can be borne off
- **Bear off:** move a checker from your home to off the board. Bearing off all of your checkers wins you the game
- **Bear in:** move a checker into your home board
- **Prime:** 4 or more anchors in contiguous positions on the board
- **Pip count:** the total distance all of a player’s pieces must move for them all to have been borne off
- **Doubling point:** the defined points at which a player offers a double to their opponent, or rejects a double they have been offered
- **Doubling cube:** a device that can double the stake of the game.
 - o If accepted, the winner receives twice the number of points.
 - o If rejected, the person who offered the cube wins the game by the current value of the cube
 - o i.e. if the cube is rejected when it has a value of 4, the player who offered the double would gain 4 points.
- **Race position:** a board state where both players have moved all of their pieces past each other
- **Contact position:** all other board states
